

# Transfer of Credit Policies -

Transfer of Credit for courses completed at other schools is determined on a case-by-case basis by the Directors. Factors evaluated will include the program approvals/accreditations of the previously attended school, the syllabus of the course(s) in question, the grade achieved by the student, and the length of time intervening. In some cases, the student may be required to take a written or practical test in order to obtain the credit for previous training or for obtaining credit for auditing of classes. School may limit the number of students per class that enroll that have transfer of credit. Chiropractors, Nurses & Physical Therapist may request opportunity to obtain credit hours by testing out of some classes. Students who fail to complete and try to reapply may be required to retake classes and pay again. School reserves the right to not accept transfer credits. All prior training for VA students will be evaluated and applied appropriately. VA students may not receive VA funding for any training in which they have prior credit.
